With your hair and make up done to perfection and wearing THAT dress, what better time in your life will there be to make a [living record](#) of you and your loved ones?

Only video captures the sound, movement and colour of your special day so you can relive the joy, laughter, tears and happiness whenever you like.

Our style is [natural](#), [candid](#), [realistic](#); the aim being to make an accurate record of the day and present it in a simple elegant way.

### The Shoot - *“from this day forward”*

You'll be recorded in a non-intrusive documentary style. You won't feel like there's a camera in your face all day, in fact much of the time you won't be aware of the camera at all. We won't hassle you or your guests with “interviews” or expect you to behave unnaturally.

Our method requires an experienced specialist skill set in order to capture stunning, flattering, [once in a lifetime images](#) as they occur, with a minimum of fuss.

No matter how good the pictures are, if the sound is poor the whole production will seem amateurish. At the ceremony and reception we use radio microphones and tiny digital recorders so all important sound sources are recorded properly.

### The Edit - *“for better, for worse”*

Have you watched a wedding video and being bored to tears? Chances are it wasn't edited well. Editing is not about adding cheesy effects, it is about keeping the [audience interested](#). Every shot is trimmed, sound levels adjusted and music added. Effects are used sparingly where appropriate such as slow motion and blur. This takes considerable time – sometimes 60 hours to complete a wedding. We can legally use any commercial music, so you can pick your own soundtrack, or leave it to us.

The [package finale](#) is the highlights of your day: all the best shots telling the story of your wedding in a moving visual style, cut to your special song.

### The Finished Product - *“to have and to hold”*

Each significant event of the day will have its own chapter. Your discs are beautifully presented in library cases with photos on the cover and on the discs themselves. Just like your photo album, your wedding video will be a [visual heirloom](#) to be treasured for years to come. If you choose one of our HD packages, your wedding will be on Blu-ray Disk in High Definition.

### Why Choose Supernova?

[Professional and Experienced](#). Your wedding will be shot and edited by Mark personally. Mark has worked in TV and video production since 1984. His work has been seen around the world. The combination of real world experience and the passion for new technology means you benefit from the latest equipment operated by a passionate skilled professional.

## PACKAGES

Because of the need to book so far in advance, most couples aren't sure exactly what they want when they book. You don't need to decide on a package yet. Book your date and relax. Worry about the details later.

OPTIONS:

HD \$ .....

## THINGS TO CONSIDER

- Still undecided? Ask to see examples of our work, preferably in your chosen venues.
- Consider a second camera at the ceremony for the best coverage.
- As a courtesy, inform your celebrant, MC, photographer, DJ, and reception coordinator that you are having a professional video done. We often need their cooperation to put mics on celebrants, patch into the DJ or venue sound system, control the light levels in churches or reception rooms etc.
- If our finish time is after 8pm, we ask that a meal is provided at the reception while the guests are having their main course.
- See [www.supernova.net.au](http://www.supernova.net.au) for the latest information on wedding videos and more.
